# YALE MISSION IN THE FAR EAST.

First of Its Kind to be Established By American Graduates.

TO BE ON BROADEST LINES.

To Carry on Evangelical, Medical and Educational Work in Large Student Center in North China.

New Haven, Conn., June 25 .- One of

the most important announcements of he Yale commencement season was the reference by Prest, Hadley, in his address this morning to the plan of a group of Yale men to establish a mission in the far east. This mission, which is the first of its kind to be established by graduates of any American collage, is to be conducted along the broadest lines, carrying on evangelical, medical and especially educational work in a large student center in north China. It is to be undenominational and independent of existing societies, but will work in harmony with them, and in specially close sympathy with the American board. This last named society has promised its moral support and its co-operation in certain practical matters such as the purchase and distribution of supplies.

The mission is to be under the leader-

ship of Rev. Harlsn P. Beach of the class of 1878, at present educational secretary of the Student volunteer movement, and from 1883 to 1890, a missionary in China.

The mission is an entirely voluntary association of Yale men and will hold no official connection with the univer-

sity but many of the officials of the latter, including the president, are among its strongest supporters. It is to be controlled by a council of 40 men who have consented to serve in this capacity, with the following officers:
President, Rev. Timothy Dwight, D. D., LL. D.; vice president, Rev. Edwin Lines, D.D., of New Haven; corres-

ronding secretary, William Sloane, of New York: treasurer, Pierce Welsh, of

New Haven. The Congregational, Episcopalian, Presbyterian and Baptist churches are thus represented among the officers of the council. All details of administra-tion will be left to an executive committee, consisting at present of the the plans for the mission and raised an installation fund of about \$20,000: Deans Sanders and Wright; F. Wells. Williams, professor of oriental history at Yale James W. Cooper, D.D., Yale corporation; Rev. H. T. Beach, secretary of the Student volunteer movement; Arthur C. Williams of the class of 1898. Prof. Edward B. Reed, and inson Phelps Stokes, Jr., secretary of

he university.

Prof. Reed will act as executive sec-etary. The medical examiner is to be Dr. Walter James of New York. Rev. L. P. Thurston of the class of '98, with another recent graduate, will go to China this fall, spending a year studying the language. It is expected that in due season, Yale will send out vill work for Christian education in

#### INSURANCE ON KING'S LIFE, Would be a Staggering Blow English Companies.

New York, June 25.—In the event of the death of King Edward VII, the insurance companies of England will suffer the most staggering blow known in the history of that branch of finanial investment.

It will cause a loss of tens of million of dollars to the regularly organized life insurance companies of various oth-er kinds, which have taken heavy risks on the king's life at high rates of interest.

American life insurance companies, however, will suffer no loss because, in this country, to obtain life insurance policies the applicant must establish an insurable interest in the person insured. King Edward carries the enormous sum of \$3,600,000 placed with English companies. This is on personal

English companies. This is on personal policies, upon which he pays premiums out of his private purse. The total risks on his life, on policies by business men is placed at \$21,000,000.

The czar of Russia is said to carry personal insurance of \$4,000,000 as well as \$1,500,000 on the life of the czarina and \$2,500,000 on that of Grand Duchess Olga. The emperor of Germany carries \$5,000,000 personal insurance.
